FROM THE DIRECTOR'S DESK

We celebrated **Doctor's Day on 01/07/2024** and **Nurse's Day on 12/05/2024**. We extend our heartfelt gratitude to all our doctors and nurses who are the pillars of our hospital. They, by their empathy, compassion and unwavering dedication have made a difference in the lives of our patients and have given them hope of recovery, especially those with life threatening diseases. In fact, as per feedback received from our patients we have the best doctors and nurses. However, we should not rest on our laurels, but should constantly strive for excellence by relentless pursuit of knowledge, honing our skills and keeping abreast with the latest developments. We should consider utilizing Artificial Intelligence (AI) in prediction, diagnosis and real-time patient monitoring.

Our Oncology block, equipped with cutting – edge technology, state-of-the-art equipments and skilled professionals, where synergy of modern medicine and “Care with love” come together to transform the lives of patients will become fully operational shortly. We intend performing bone marrow transplant surgeries shortly. I am glad to inform that Dr. Ramaswamy N. V., a renowned Haematologist, who has vast experience of successfully performing bone marrow transplant surgeries, has joined our Hospital last month. Thus our Oncology department by providing comprehensive cancer care will shortly become a beacon of hope for those seeking specialized and holistic cancer care at affordable cost and a preferred destination for Cancer patients from all over the state.

We express our deepest condolence to Shri. N. Joy, who lost his life while cleaning a garbage filled canal on railway premises in Thiruvananthapuram. This has happened, because we tend to keep our houses clean but dump garbage indiscriminately in public places, canals, drains etc. resulting in clogging of our water bodies, leading to ecological and public health issues. Unclean premises and piling up of garbage provide conducive environment for breeding of mosquitoes, harmful organisms resulting in epidemics. In fact, we are in the midst of epidemics such as H1N1, viral fever, hepatitis, dengue, West Nile virus which are spreading rapidly. So we should be vigilant and should take proactive hygienic measures such as stopping of dumping garbages in public places, ensuring cleanliness of public premises. These habits should be inculcated in our children, right from childhood.

Last week, youngsters hit news headlines as Argentina team which won COPA AMERICA and Spanish team which won EURO CUP were dominated by youngsters. In fact, the two architects of Spain's win, Lamine Yamal and Nico Williams had just turned 17 and 22 respectively. We should strive to harness the power of youth in developing our nation especially since India is fortunate in having comparatively more youth as compared to several other countries including developed countries.

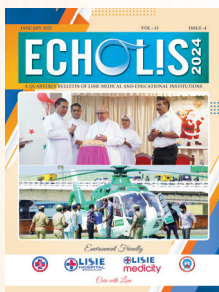

May Lord Jesus Christ shower you and your family with unlimited blessings filled with lots of love, happiness and prosperity.

May God Bless You All !!!!!
